

Short Course in Lower GI Physiology

Continuing Professional Development

Features

Three day course based at the Northern General Hospital in Sheffield, designed to fulfil Professional Body requirements. A University of Newcastle Certification of Achievement (10 credits) will be awarded to those opting to undertake assessments. The course can be taken as 'attendance only' for those wishing to access teaching without assessment. Please note the examination will take place in May or June 2017 in attendance at Newcastle University. Designed for Trainee Clinical Scientists, Doctors, Clinical Nurse Specialists and qualified in-service practitioners who are seeking professional updating and upgrading. Developed in collaboration with members of the Association of Gastro-Intestinal Physiologists of the British Society of Gastroenterology (AGIP) as an AGIP Professional Body examination. The course will be studied alongside Healthcare Scientists studying for the Health Education England accredited MSc in Clinical Science (Physiological Sciences: GI Physiology & Urodynamics) award from Newcastle University.

Ongoing academic support will be available via the virtual learning environment (Blackboard) and e-mail.

Overview

This module gives the underpinning knowledge of lower GI Physiology and endo-anal ultrasound. It is designed to support work-based, competency based training.

Learning Outcomes

Describe and critically evaluate a wide range of techniques and protocols used to investigate lower gastrointestinal function;
Demonstrate an understanding of biofeedback/pelvic floor retraining in incontinence and constipation;
Demonstrate an understanding of the methods of self irrigation to control symptoms of faecal incontinence and constipation
Demonstrate an understanding of percutaneous tibial nerve (PTNS) and sacral nerve stimulation (SNS);
Make accurate assessment and evaluations from physiological data;
Communicate instructions, clinical concepts and data effectively to colleagues and patients;
Explain and implement Human Rights, Health & Safety issues and legislation applicable within a clinical environment.

Entry Requirements

2:2 degree in an appropriate subject. At the University's discretion only, practitioners with relevant experience may be considered, providing they can demonstrate the necessary motivation and academic potential to successfully complete the course. It is anticipated that participants will all be employed within the relevant sector of the Health Services.

Fees

The cost of this course is £435. The course fee covers teaching, tutor support, assignments and examination. It does not cover accommodation, travel or subsistence.

Course Dates: 13th September – 15th September 2016
